

## THE GAZETTE.

WEDNESDAY EVENING, OCTOBER 25.

**THE GAZETTE.**  
 DEVICES OF AUTUMN LEAVES.—An exquisite transparency may be made by arranging pressed ferns, grasses, and Autumn leaves on a pane of window glass, lapping another pane of the same size over it, and binding the edge with ribbon, having the group imprisoned between. Use gum tragacanth in putting on the binding. It is well to secure a narrow strip of paper under the ribbon. The binding should be gummed all around the edge of the first pane, and dried before the leaves, ferns, etc., are arranged; then it can be neatly folded over the second pane without difficulty. To form the loop for hanging the transparency, paste a binding of galloen along the edge, leaving a two inch loop free in the center, afterwards to be pulled through a little slit in the final binding. These transparencies may either be hung before a window or if preferred, secured against a pane in the sash. In halls a beautiful effect is produced in placing them against the side lights of the hall door. Where the side lights are each on a single pane, it is well worth while to place a single transparency against each, filling up the entire space, thus affording ample scope for a free arrangement of ferns, grasses and leaves, while the effect of the light passing through the rich Autumn colors is very fine. Leaves so arranged will preserve their beauty the entire Winter.

**HYDRATE OF CHLORAL.**—A case of rattlesnake poison has lately been cured by hydrate of chloral at Point Pleasant, N. J. A young man bitten by the rattlesnake, and exhibiting the usual violent and alarming symptoms, was treated with the hydrate, five doses of twenty grains each being administered, when sleep followed, and the patient awoke after several hours with every symptom of the poisoning gone.
